The scrapy file toi_spiders.py scrapes the data for one year from Times of India and saves it in a csv. To modify it for a specific year, do the following:

Let's say we want to scrape the data for 2017.

Go to : https://timesofindia.indiatimes.com/archive.cms

The following is displayed:

SEARCH BY DATE Archives 2020 January | February | March | April | May | June | 2019 January | February | March | April | May | June | July | August | September | October | November | December | 2018 January | February | March | April | May | June | July | August | September | October | November | December | 2017 January | February | March | April | May | June | July | August | September | October | November | December | 2016 January | February | March | April | May | June | July | August | September | October | November | December | 2015 January | February | March | April | May | June | July | August | September | October | November | December | 2014 January | February | March | April | May | June | July | August | September | October | November | December | 2013 January | February | March | April | May | June | July | August | September | October | November | December | 2012 January | February | March | April | May | June | July | August | September | October | November | December | 2012 January | February | March | April | May | June | July | August | September | October | November | December | 2011 January | February | March | April | May | June | July | August | September | October | November | December | 2011 January | February | March | April | May | June | July | August | September | October | November | December | 2011 January | February | March | April | May | June | July | August | September | October | November | December | 2011 January | February | March | April | May | June | July | August | September | October | November | December | 2011

Then click on January under 2017

The following window opens up

S	M	T	W	Т	F	S
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31				

Click on 1 in the calendar.

The following screen shows:

Copy the address of the page:

https://timesofindia.indiatimes.com/2017/1/1/archivelist/year-2017,month-1,starttime-42736.cms

Paste this link in the start_urls in the toi_spider.py file.

```
import scrapy
class Spider(scrapy.Spider):
  name = "toi_spider'
  start_urls = ["https://timesofindia.indiatimes.com/2009/1/1/archivelist/year-2009,month-1,starttime-39814.cms"]
  def numberofdays(self, month, year):
    x = int(month)
    y = int(year)
    numberdays = 0
    if(x == 1 \text{ or } x == 3 \text{ or } x == 5 \text{ or } x == 7 \text{ or } x == 8 \text{ or } x == 10 \text{ or } x == 12):
      numberdays = 31
    elif (x == 2):
      if (y \% 4 == 0):
        numberdays = 29
        numberdays = 28
      numberdays = 30
    return numberdays
```

How to Run the scrapy file?

Install Scrapy: pip3 install scrapy
StartProject: scrapy startproject isb
Move: cd isb/isb/spiders
Paste the toi spiders.py file in this folder.

Run: scrapy crawl toi_spider -o out.csv
